

BEN TEMBE

FRONTEND DEVELOPER

ABOUT ME

Final-year CS student who builds practical, user-focused software; from an AI-powered agricultural assistant to a student course-finder platform. My technical skills include Java, JavaScript, PL/SQL, and REST APIs, and experienced working in small teams to take ideas from concept to working product.

EDUCATION

Tshwane University Of Technology

Diploma in Computer Science - PENDING WIL

SKILLS

Java
JavaScript
HTML/CSS
PL/SQL
NodeJS

LANGUAGE

- English
- IsiZulu

 (063) 896 2051

EXPERIENCE

○ Frontend Developer - University Project

Final Year Computer science Software Project

- Developed the AI and backend for the platform, including the AI chatbot, REST APIs, and core system functionality.
- Coordinated development by organizing team meetings, tracking progress, and resolving technical challenges.
- Shaped the product by contributing AI-driven features, such as fertilizer recommendation based on soil condition and crop type, irrigation system based on expected precipitation

○ Full Stack Developer - University Project

Industry Level Project

- Built the frontend using JSP and Servlets, with client-side form validation in JavaScript to improve data integrity and UX
- Developed Servlet and JSP components handling request logic and dynamic content rendering for the chatbot feature
